

## **BATS Completes Migration from Super Montage to NSX**

Kansas City, MO May 19, 2006 / -- Based on a successful pilot this week, BATS has decided continue quoting on NSX only.

BATS liquidity will NOT be available via Nasdaq Super Montage. It is important for us to complete our migration off Super Montage before Nasdaq migrates onto the Inet platform and eliminates support for ECN order delivery.

BATS continues to display its quotes at the National Stock Exchange (NSX). Subscribers wishing to access BATS liquidity should ensure they have direct BATS connectivity, NSX connectivity, or indirect connectivity via a vendor that supports BATS. We feel that the NSX platform presents the best economics for BATS and our Subscribers.

We appreciate your feedback and support during this transition.
